

PROFESSIONAL EXPERIENCE

Jan 2024 - Present

Software Engineer at ION Trading

- Engineered an end-to-end auction data platform (CMS → agentic automation)
 - CMS Foundation (Angular • .NET • PostgreSQL • AWS)
 - Built a CMS to standardize analyst verification and centralize unstructured auction data capture for global M&A auctions.
 - Event-Driven Agentic Framework (Kafka • Kubernetes • OpenSearch)
 - Expanded the platform into an event-driven agentic layer to automate ingestion & structuring of **7K articles/month** with HITL checkpoints for quality control.
 - Deployed Kubernetes microservices (Helm) with Kafka streaming and OpenSearch analytics for scalable event processing and search.
 - Eliminated **13,000 hours/year of manual effort** and scaled coverage from **30 → 200+ regions** without additional headcount.

OPEN SOURCE & LEADERSHIP — OPPIA (GOOGLE-BACKED OSS)

Jan 2022 - Aug 2023

- Contributed to Oppia, a large-scale open-source learning platform serving **1M+ global users**.
- Led the Learner and Creator Experience Team, providing technical guidance to **14 engineers** on both frontend (Angular) and backend (Python) development.
- Triaged and resolved **300+ GitHub issues**, improving release stability and development velocity.
- Coordinated with **6 cross-functional teams** (product, QA, content, infra) to prioritize and deliver features.
- Proposed 7 project ideas selected for **Google Summer of Code 2023**.
- Member of the Release Team for **4 major public releases**, improving QA and deployment processes.

PROJECTS

- Histopathological Image Segmentation:** Implemented a U-Net model (TensorFlow/Keras) for breast MRI tumor segmentation, informed by a comparative literature review and validated against ground-truth masks.
- CodeRunner 2.0:** Authored and conducted a **6-day competitive programming contest for 140+ participants**, leveraging my role as Head of Competitive Programming at Microsoft Innovations Club.

TECHNICAL SKILLS

- Languages:** C++, C#, Typescript, Python
- Frameworks and Libraries:** Angular, .NET, Django, Apache Spark
- Backend Architecture & Messaging:** Kafka, REST APIs
- Cloud computing platforms:** AWS

EDUCATION

B.Tech in Computer Science and Engineering (AI/ML Specialization)	2024
Vellore Institute of Technology, Chennai	CGPA: 8.89/10
Higher Secondary (XII), Science Stream	2020
Kuriakose Elias English Medium School, Mannanam	Percentage: 97%

ACHIEVEMENTS

- Secured an All India Rank (AIR) of 10586 in JEE (Advanced) and 97.78 percentile in JEE (Main).
- ACM-ICPC (2020-2021): Participated in the preliminary round (Secured a rank of 2290).
- CodeForces Rating (Highest): **1401 (profile)** ; CodeChef Rating (Highest): **1526 (profile)**

CERTIFICATIONS AND COURSEWORK

- Mathematics for Machine Learning - Coursera ([cert.](#))
- Artificial Intelligence Analyst - IBM ([cert.](#))
- Neural Networks and Deep Learning - Coursera ([cert.](#))
- CSE2011 - Data Structures And Algorithms
- CSE1004 - Networks And Communication
- DBMS, OOP
- Operating Systems, Computer Architecture
- Information security, AR/VR
